**Aberdeen, 1800-2000** - W. Hamish Fraser 2000
To Mark the New Millennium Aberdeen City Council has commissioned a new history of Aberdeen in two volumes: Aberdeen, 1800 to 2000 and Aberdeen before 1800.

**Aberdeen Before 1800** - E. Patricia Dennison 2002
This volume, the earlier of the two-volume official History of Aberdeen, provides a comprehensive picture of the development of the two historic burghs of Old Aberdeen and New Aberdeen over their first seven centuries, from 1100 to 1800. As early as the 14th century, Aberdeen was recognized as one of the 'four great towns of Scotland'. Early settlement, the growing townscape and social change over the centuries are all traced. Aberdeen's contacts with the sea and other towns overseas and its economy and politics, both local and national, are assessed. And Aberdonians themselves, the vital forces behind the history of the two burghs, are highlighted: their faith and culture, homes and health, and their education and pastimes are all rediscovered.

**Aberdeen: 1800-2000** - Elizabeth Patricia Dennison 2002

**James Clerk Maxwell** - Raymond Flood 2014-01
James Clerk Maxwell (1831 -1879) was one of the most important mathematical physicists of all time, coming only after Newton and Einstein. In scientific terms his immortality is enshrined in electromagnetism and Maxwell's equations, but as this book shows, there was much more to Maxwell than electromagnetism, both in terms of his science and his wider life. Maxwell's life and contributions to science are so rich that they demand the expertise of a range of academics - physicists, mathematicians, and historians of science and literature - to do him justice. The various chapters will enable Maxwell to be seen from a range of perspectives. Early chapters deal with wider aspects of his life in time and place before looking in more detail at his wide ranging contributions to science, with concluding chapters on Maxwell's poetry and Christian faith. Each chapter is self-contained and can be read independently of the others.

**Scottish Dance Beyond 1805** - Patricia H Ballantyne 2019-12-20
Scottish Dance Beyond 1805 presents a history of Scottish music and dance over the last 200 years, with a focus on sources originating in Aberdeenshire, when steps could be adapted in any way the dancer pleased. The book explains the major changes in the way that dance was taught and performed by chronicling the shift from individual dancing masters to professional, licensed members of regulatory societies. This ethnographical study assesses how dances such as the Highland Fling have been altered and how standardisation has affected contemporary Highland dance and music, by examining the experience of dancers and pipers. It considers reactions to regulation and standardisation through the introduction to Scotland of percussive step dance and caller-facilitated ceilidh dancing. Today's Highland
dancing is a standardised and international form of dance. This book tells the story of what changed over the last 200 years and why. It unfolds through a series of colourful characters, through the dances they taught and the music they danced to and through the story of one dance in particular, the Highland Fling. It considers how Scottish dance reflected changes in Scottish society and culture. The book will be of interest to scholars and postgraduates in the fields of Dance History, Ethnomusicology, Ethnochoreology, Ethnology and Folklore, Cultural History, Scottish Studies and Scottish Traditional Music as well as to teachers, judges and practitioners of Highland dancing and to those interested in the history of Scottish dance, music and culture.

Aberdeen-Ian R Mitchell 2020-05-15 Ian R Mitchell recognises his hometown is an often underloved place, but in Aberdeen: Beyond the Granite he sets out an overwhelming case as to why this sentiment is thoroughly undeserved. An Aberdonian born and bred, Mitchell has lived in Glasgow for almost four decades. Returning to his roots, he delves into Aberdeen's rich and often unseen history and culture from an exile's perspective, revealing a proudly unique city, home to the world's oldest surviving company, the UK's oldest newspaper, and perhaps Britain's oldest Italian restaurant!

The Anatomy Museum-Elizabeth Hallam 2008 Anatomy museums around the world showcase preserved corpses in service of education and medical advancement, but they are little-known and have been largely hidden from the public eye. Elizabeth Hallam here investigates the anatomy museum and how it reveals the fascination and fears that surround the dead body in Western societies. Hallam explores the history of these museums and how they operate in the current cultural environment. Their regulated access increasingly clashes with evolving public mores toward the exposed body, as demonstrated by the international popularity of the Body Worlds exhibition. The book examines such related topics as artistic works that employ the images of dead bodies and the larger ongoing debate over the disposal of corpses. Issues such as aesthetics and science, organ and body donations, and the dead body in Western religion and ritual are also discussed here in fascinating depth. The Anatomy Museum unearths a strange and compelling cultural history that investigates the ideas of preservation, human rituals of death, and the spaces that our bodies occupy in this life and beyond.

Fixing the Indemnity-Iain D. Campbell 2007-09-01 Sir George Adam Smith (1856-1942) was one of the leading Old Testament scholars in the late-nineteenth- and early-twentieth-century Scottish church. As Free Church minister of Queen's Cross, Aberdeen (1882-1902), Professor of Old Testament Language and Literature at the Free Church College, Glasgow (1892-1910), and Principal of Aberdeen University (1910-1935) he popularized modern criticism of the Old Testament. He was determined to show how such an approach to the Bible was compatible with evangelical faith, a position that never sat easily with the confessional position of the Scottish church, and the story of Smith's life is an investigation into the relationship between biblical scholarship and evangelical faith. In this new biography, Campbell has made extensive use of primary material, including Smith's letters and journals, to fill a gap in the literature on events within the Scottish church in the late nineteenth and early twentieth century. This critical biography will be of use both to students of Scottish church history and students of Old Testament criticism, as well as raising issues that are of continuing importance for all who believe in confessional Christianity as well as in scholarly study of the biblical text.

Two Firsts-Constance Backhouse 2019-03-08 Bertha Wilson and Claire L'Heureux-Dubé were the first women judges on the Supreme Court of Canada. Their 1980s judicial appointments delighted feminists and shocked the legal establishment. Polar opposites in background and temperament, the two faced many identical challenges. Constance Backhouse’s compelling narrative explores the sexist roadblocks both women faced in education, law practice, and in the courts. She profiles their different ways of coping, their landmark decisions for women’s rights, and their less stellar records on race. To explore the lives and careers of these two path-breaking women is to venture into a world of legal sexism from a past era. The question becomes, how much of that sexism has been relegated to the bins of history, and how much continues?

Police Courts in Nineteenth-Century Scotland, Volume 1-Dr David G Barrie 2014-12-28 Taking the form of two companion volumes, Police Courts in Nineteenth-Century Scotland represents the first major investigation into summary justice in Scottish towns, c.1800 to 1892. Each volume explores diverse, but complementary, themes relating to judicial practices, relationships, experiences and discourses through the lens of the same subject matter: the police court. Volume 1, with the subtitle Magistrates, Media and the Masses, provides an institutional, social and cultural history of the establishment, development and practice of police courts. It explores their rise, purpose and internal workings, and how justice was administered and experienced by those who attended them in a variety of roles. Special attention is given to examining how courtroom discourse was represented in print culture, the role of the media in providing a discursive commentary on summary justice, and the ways in which magistrates and the police engaged in a law and order dialogue with the press. Throughout, consideration is given to uncovering the relationship between magistrates, the courts, the police and the wider community, and to charting the implications of the rise of summary justice and the 'police-man' state for the urban masses (as evidenced through prosecution, conviction and punishment patterns). Volume 2, with the subtitle Boundaries, Behaviours and Bodies, explores, through themed case studies, how police courts shaped conceptual, spatial, temporal and commercial boundaries by regulating every-day activities, pastimes and cultures.

A Prophetic Voice—David Smith Cairns (1862-1946)-Marlene Elizabeth Finlayson 2018-12-07 This biography provides an exploration of the formative influences, development, and impact of the theology of David Smith Cairns, Scottish minister, academic, and writer, during the high point of British imperial expansion, and at a time of social tension caused...
by industrialization. It describes and evaluates his role in the Church's efforts to face major challenges relating to its relationships to the different world religions, its response to the First World War, and its attitude to the scientific disciplines that called into question some of its longstanding perceptions and suppositions. An eminent figure, born into the United Presbyterian Church and rooted in the Church in Scotland, Cairns operated ecumenically and internationally. His apologetics challenged the prevailing assumptions of the day: that science provided the only intellectually legitimate means of exploring the world, and that scientific determinism ruled out the Christian conception of the world as governed by providence. A major feature of his theology was the presentation of Christianity as a "reasonable" faith, and throughout his life he maintained a particular concern for young people, having endured his own crisis of faith when a student in Edinburgh. He enjoyed a decades-long involvement with the World Student Christian Federation, based on a mutually enriching relationship with one of its leading figures, the renowned American evangelist John Raleigh Mott.

The Road to Independence?-Murray Pittock
2008-03-15 Independence has been a contested issue in Scotland since the region was first invaded by England in 1707, and the realm continues to linger in a no-man's land between regional status and full sovereignty. The issue of independence has risen to the forefront of Scottish discussion in the past fifty years and Murray Pittock offers here an examination of modern Scottish nationalism and what it means for the United Kingdom. Pittock charts Scotland's economic, cultural, and social histories, focusing on the history and cultural impact of Scottish cities and industries, the role of multiculturalism in contemporary Scottish society, and the upheaval of devolution, including the 2007 election of Scotland's first nationalist government. From the architecture and art of Edinburgh and Glasgow to the Scottish Parliament, the book investigates every aspect of modern Scottish society to explain the striking rise of Scottish nationalism since 1960. The Road to Independence? reveals a new perspective on modern Scottish culture, making it an invaluable read for history scholars and lovers of Scotland alike.

Civil Society, Associations, and Urban Places-Graeme Morton
2006 Civil society has become central to the historian's understanding of class, cultural and political power in the nineteenth century town and city. This volume brings together essays by an international group of urban historians who examine the construction of civil society from associational activity in the urban place. The volume shows that a deep and interlocking civil society does not automatically lead to a rise in democratic activity.

Scotland and Tourism-Alastair J. Durie
2017-01-20 Tourism has long been important to Scotland. It has become all the more significant as the financial sector has faltered and other mainstays are in apparent long-term decline. Yet there is no assessment of this industry and its place over the long run, no one account of what it has meant to previous generations and continues
to mean to the present one, of what led to growth or what indeed has led people of late to look elsewhere. This book brings together work from many periods and perspectives. It draws on a wide range of source material, academic and non-academic, from local studies and general analyses, visitors’ accounts, hotel records, newspaper and journal commentaries, photographs and even cartoons. It reviews arguments over the cultural and economic impact of tourism, and retrieves the experience of the visited, of the host communities as well as the visitors. It questions some of the orthodoxies – that Scott made Scott-land, or that it was charter air flights that pulled the rug from under the mass market – and sheds light on what in the Scottish package appealed, and what did not, and to whom; how provision changed, or failed to change; and what marketing strategies may have achieved. It charts changes in accommodation, from inn to hotel, holiday camp, caravanning and timeshare. The role of transport is a central feature: that of the steamship and the railway in opening up Scotland, and later of motor transport in reshaping patterns of holidaymaking. Throughout there is an emphasis on the comparative: asking what was distinctive about the forms and nature of tourism in Scotland as against competing destinations elsewhere in the UK and Europe. It concludes by reflecting on whether Scotland's past can inform the making and shaping of tourism policy and what cautions history might offer for the future. This prolific long-term analysis of tourism in Scotland is a must-read for all those interested in tourism history.

Stephen W Brown 2011-11-30

The first thorough study of the book trade during the age of Fergusson and Burns.

Stephen W. Brown 2011-11-30

Studies the book trade during the age of Fergusson and Burns. Over 40 leading scholars come together in this volume to scrutinise the development and impact of printing, binding, bookselling, libraries, textbooks, distribution and international trade, copyright, piracy, literacy, music publication, women readers, children's books and cookery books. The 18th century saw Scotland become a global leader in publishing, both through landmark challenges to the early copyright legislation and through the development of intricate overseas markets that extended across Europe, Asia and the Americas. Scots in Edinburgh, Glasgow, London, Dublin and Philadelphia amassed fortunes while bringing to international markets classics in medicine and economics by Scottish authors, as well as such enduring works of reference as the Encyclopaedia Britannica. Entrepreneurship and a vigorous sense of nationalism brought Scotland from financial destitution at the time of the 1707 Union to extraordinary wealth by the 1790s. Publishing was one of the country's elite new industries.

Doric

J. Derrick McClure 2002-09-27

The dialect of North-East Scotland, one of the most distinctive and best preserved in the country, survives as both a proudly maintained mark of local identity and the vehicle for a remarkable regional literature. The present study, after placing the dialect in its historical, geographical and social context, discusses in some detail a selection of previous accounts of its distinctive characteristics of phonology and grammar, showing that its shibboleths have been well recognised, and have remained consistent, over a long period. Passages of recorded speech are then examined, with extensive use of phonetic transcription. Finally, a representative selection of written texts, dating from the eighteenth century to the present and illustrating a wide variety of styles and genres, are presented with detailed annotations. A full glossary is also included. This study clearly demonstrates both the individuality of the dialect and the richness of the local culture of which it is an integral part.

Ourselves and Others

Graeme Morton 2012-07-18

This revised and updated volume of the New History of Scotland series explores a period of intense identity formation in Scotland.
Examining the 'us and them' mentality, it delivers an account of the blended nature of Scottish society through the transformations of the industrial era from 1832 to 1914. Alongside the history of Scotland's national identity, and its linked political and social institutions, is an account of the changing nature of society within Scotland and the relentless eddy of historical developments from home and away. Where previous histories of this period have focused on industry, this book will take a closer look at the people that helped to form Scottish national identity. Graeme Morton shows that identity was a key element in explaining Industrial Scotland, charting the interplay between the micro and the macro and merging the histories of the Scots and the Scottish nation.

**Women in Port** - 2012-09-28 Bringing together work by Atlantic world scholars on the cutting edge of their respective fields, *Women in Port*'s practical application of microhistorical approaches achieves a depth and breadth that helps reframe our understanding of women's possibilities in the Atlantic world.

**Britain and the Sea** - Glen O'Hara 2010-06-30 In this first full-scale treatment of Britain's relationship with the surrounding oceans, Glen O'Hara examines the history of British people's maritime lives and, in turn, the formation of British cultural identities. A lens through which to view British life, Britain and the Sea spans more than 400 years, beginning in 1600 and taking us through to the present day. Tying together every aspect in the development of Great Britain, from state formation, industrialization and modernization, through to histories of transport, migration, slavery, warfare and crime, this book illustrates how the rich tapestry of Britain's narrative was decided not among the fields of the 'green and pleasant land', but out at sea.

Clive Lee explores the fluctuations in state spending, highlighting the ongoing political conflict over the size and extent of welfare provision.

**Periodizing Secularization** - Clive D. Field 2019-10-31 Moving beyond the (now somewhat tired) debates about secularization as paradigm, theory, or master narrative, *Periodizing Secularization* focuses upon the empirical evidence for secularization, viewed in its descriptive sense as the waning social influence of religion, in Britain. Particular emphasis is attached to the two key performance indicators of religious allegiance and churchgoing, each subsuming several sub-indicators, between 1880 and 1945, including the first substantive account of secularization during the fin de siècle. A wide range of primary sources is deployed, many of them relatively or entirely unknown, and with due regard to their methodological and interpretative challenges. On the back of them, a cross-cutting statistical measure of 'active church adherence' is devised, which clearly shows how secularization has been a reality and a gradual, not revolutionary, process. The most likely causes of secularization were an incremental demise of a Sabbatarian culture (coupled with the associated emergence of new leisure opportunities and transport links) and of religious socialization (in the church, at home, and in the school). The analysis is also extended backwards, to include a summary of developments during the eighteenth and early nineteenth centuries; and laterally, to incorporate a preliminary evaluation of a six-dimensional model of 'diffusive religion', demonstrating that these alternative performance indicators have hitherto failed to prove that secularization has not occurred. The book is designed as a prequel to the author’s previous volumes on the chronology of British secularization - *Britain's Last Religious Revival?* (2015) and *Secularization in the Long 1960s* (2017). Together, they offer a holistic picture of religious transformation in Britain during the key

NeoLiberal Scotland - Patricia McCafferty
2009-12-14 NeoLiberal Scotland argues that far from passing Scotland by, as is so often claimed, neoliberalism has in fact become institutionalised there. As the mainstream political parties converge on market-friendly policies and business interests are equated with the public good, the Scottish population has become more and more distanced from the democratic process, to the extent that an increasing number now fail to vote in elections. This book details for the first time these negative effects of neoliberal policies on Scottish society and takes to task those academics and others who either defend the neoliberal order or refuse to recognise that it exists. NeoLiberal Scotland represents both an intervention in contemporary debates about the condition of Scotland and a case study, of more general interest, of how neoliberalism has affected one of the “stateless nations” of the advanced West. Chapter One takes an overview of the origin and rise of neoliberalism in the developed world, arguing that it repudiates rather than continues the thought of Adam Smith and the Scottish Enlightenment. Part One addresses the fundamental issue of social class in Scotland over three chapters. Chapter Two attempts to locate the ruling class both internally and externally. Chapter Three explores the changing nature of working class membership and its collective experience. Chapter Four follows the working class into the workplace where heightened tensions in the state sector have provoked an increasingly militant response from trade unionists. Part Two engages with the broader impact of neoliberalism on Scottish society through a diverse series of studies. Chapter Five assesses claims by successive Scottish governments that they have been pursuing environmental justice. Chapter Six examines how Glasgow has been reconfigured as a classic example of the “neoliberal city”. Chapter Seven looks at another aspect of Glasgow, in this case as the main destination of Eastern European migrants who have arrived in Scotland through the international impact of neoliberal globalisation. Chapter Eight investigates the economic intrusion of private capital into the custodial network and the ideological emphasis on punishment as the main objective in sentencing. Chapter Nine is concerned with the Scottish manifestations of “the happiness industry”, showing how market-fundamentalist notions of individual responsibility now structure even the most seemingly innocuous attempts to resolve supposed attitudinal problems. Finally, Chapter Ten demonstrates that the limited extent to which devolved Scottish governments, particularly the present SNP administration, have been able to go beyond the boundaries of neoliberal orthodoxy has been a function of the peculiarities of party competition in Holyrood, rather than representing a fundamental disavowal of the existing order.

Private Collecting, Exhibitions, and the Shaping of Art History in London - Stacey J. Pierson 2017-01-12 The Burlington Fine Arts Club was founded in London in 1866 as a gentlemen’s club with a singular remit – to exhibit members’ art collections. Exhibitions were proposed, organized, and furnished by a group of prominent members of British society who included aristocrats, artists, bankers, politicians, and museum curators. Exhibitions at their grand house in Mayfair brought many private collections and collectors to light, using members’ social connections to draw upon the finest and most diverse objects available. Through their unique mode of presentation, which brought museum-style display and interpretation to a grand domestic-style gallery
space, they also brought two forms of curatorial and art historical practice together in one unusual setting, enabling an unrestricted form of connoisseurship, where new categories of art were defined and old ones expanded. The history of this remarkable group of people has yet to be presented and is explored here for the first time. Through a framework of exhibition themes ranging from Florentine painting to Ancient Egyptian art, a study of lenders, objects, and their interpretation paints a picture of private collecting activities, connoisseurship, and art world practice that is surprisingly diverse and interconnected.
